

FOUR STEPS TO USE RESQME

1. Pull the clip away from ResQMe

2. Hook over seatbelt and pull to cut

3. Push the black head against glass corner

4. Spike releases and shatters window

THREE STEPS TO PLACE RESQME

Most of **ResQMe** owners are keeping their rescue tool right on their keychain for easy retrieval.

Another place to keep **ResQMe** is right by your seatbelt. Attach it on the belt hook. This is the perfect place for passengers who are seating on the back.

The last place that we suggest you to keep **ResQMe** is also by the visor. This is ideal if you wish to have ResQMe handy and not on your keys.

Note: Please check out regularly our site at www.resqme.com for any update and any latest news related to our safety technology.
